## 11 416 H0 Large coal bunkering system

The example on which this coal bunkering system has been modelled can be seen at Chemnitz-Hilbersdorf and is a version of the DR/DRG standard coal handling system.

This type of coal weighing bunker had been installed in many places since the 1930s.

The steel construction is very true to detail and a filigree design.

Track centre distance:  
70 mm

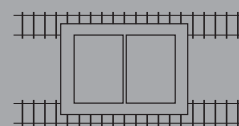

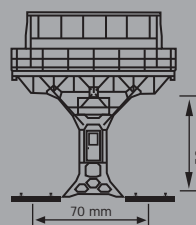

179 x 37 x 113 mm

Available from 02/2009

# NEUHEITEN 2009

**11 418 H0**  
Barthmühle  
railway station

The building, which was constructed in 1935, is located on the railway route of Elstertalbahn Gera - Greiz - Plauen (Vogtland) - Weischlitz, not far away from the Elster Valley Bridge. It is protected as architectural monument. This railway line was a major goods transport line after World War II because the towns and cities on the Weisse Elster River were major industrial locations. Long-distance trains to Czechoslovakia were also using this route.  
Original model  
290 x 40 x 68 mm  
Available from 07/2009

**41 616 H0**  
Cover and  
drawback boxes  
for ropes

These accessories make the railway overhaul workshop around the interlocking cabin very life-like. Signals and points were operated mechanically by ropes laid in channels.
